SCREW-WORM AND WOUND REMEDY

A multi-purpose remedy which effectively controls and prevents screw-worm infestation, promotes healing and kills ticks present at time of application. For use on livestock, horses, wild life, dogs, poultry and birds.

Contains % m/m

Resins and oils	99,39
Germicide	0,51
Deltamethrin	0,10

- DO NOT APPLY TO CATS.
- APPLY SPARINGLY TO BIRDS.
- Harmful if swallowed.
- Keep out of reach of children, uninformed persons and animals.
- Although this remedy has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

PRECAUTIONS

- Do not contaminate water sources or the environment.
- Dispose of containers in a safe manner and do not re-use for any other purpose.
- Store away from food and feed.
- Wash contaminated skin with soap and water.
- In the case of eye contact rinse immediately with copious amounts of water.
- In case of poisoning call a doctor and make this information available.

DIRECTIONS FOR USE – USE ONLY AS DIRECTED
DO NOT APPLY TO DEEP PENETRATING WOUNDS.

• **All wounds**

Apply in, around and above wounds (to diffuse downwards), to prevent screw-worm strike and reduce bacterial infection and promote healing. This is recommended following routine procedures such as dehorning and knife castration.

• **Screw-worm treatment**

Apply freely into, around and above infested wounds. The worms will emerge within a short period, fall to the ground and die. With small wounds one treatment ± every 4 days until healed.

Deeper wounds with extensive damage will respond more quickly if crusts and debris are gently removed before application but this is not essential.

Better results follow application to animals which are dry.

Presentation: 100 ml squeeze bottle for wound application and 500 ml refill
